

PANAGIOTIS PAPADIMITRIOU

Athens, Greece | +30 694 060 1736 | panospdm24@icloud.com
papadimitrioudev.netlify.app | github.com/papadimitrioudev | linkedin.com/in/panagiotis-papadimitriou2003

PROFILE

Technical support professional in the telecom sector with a BSc in Computer Science and an MSc in Data Analytics & Big Data in progress, transitioning into Data / Analytics Engineering. Building depth in SQL, dimensional data modeling, and the modern analytics stack through a structured, hands-on roadmap with every query written and defended personally. Daily front-line experience with the exact data a telecom analytics team works on: tickets, SLAs, churn drivers, network issues.

EXPERIENCE

Technical Support Representative — BFS (Nova account)

Athens, Greece | Mar 2026 – Present

- Diagnose connectivity, service, and equipment issues across fixed and mobile networks for Nova customers.
- Apply structured troubleshooting workflows and escalate complex cases with clear, complete documentation — the same discipline required for reproducible analysis.
- Handle high daily contact volume while maintaining resolution quality; communicate technical issues to non-technical customers.

Military Service — Clerk, 2nd Bureau, Hellenic Army (80 ADTE)

Kos, Greece | Sep 2024 – May 2025

- Monitored coastal surveillance systems and reported incidents to the Coast Guard.
- Drafted and forwarded official military signals and documents; provided basic IT and network support for the office.

EDUCATION

MSc Data Analytics & Big Data — University of Derby (Mediterranean College)

Year 1 completed; final year in progress. Coursework: Big Data processing (Python, SQL, PySpark, data warehousing), statistical techniques (R), NLP.

BSc (Hons) Computer Science — University of Derby (Mediterranean College)

Graduated Jul 2024

TECHNICAL SKILLS

Working knowledge: Excel, structured troubleshooting & incident documentation, ticketing/CRM tooling

Learning now (hands-on roadmap, every line written myself): SQL (PostgreSQL, DuckDB), dimensional data modeling, Git / GitHub

Next on roadmap (2026–2027): Google BigQuery, dbt Core, Python (pandas), Power BI

PROJECTS

Telecom analytics portfolio in progress — first project (SQL + dimensional modeling on support-ticket data) shipping October 2026. Progress tracked publicly at papadimitrioudev.netlify.app and github.com/papadimitrioudev.

ACTIVITIES

EF Global Youth Leadership Summit — Berlin, 2023

Teens Debate Program — Athens, 2019
